Sapporo

The gallery (tunnel) of the coalmine 1,000 meters under the ground can be experienced in the real tunnel of the premises. "Yubari Coalmine Gallery Tunnel " preserved as the historic site that had been an actual digging point can be seen in the tour of the museum. The digging machine and the layers of coal left in the gallery tunnel give the visitors the real feeling of the coalmine workers digging in the tunnel. The huge coal layer exposed on the ground on the premises is the natural monument nominated by Hokkaido Government.

Yubari Rokumeikan

This facility was built and used as the guest house called "Hokutan Shikanotani Club" by Hokkaido Tankou Kisen Inc. called "Hokutan". in the second year of Taishou Era, in 1913 when the company was in full flourish and the guest house had been in use until 1983. It had the

夕張市鹿の谷2丁目4番地 TEL: 0123-53-2555

premises of 85,330 square meters and was a one-story wooden house of 1,500 square meters built with the state-of-the-art

technology at that time. It can be said that the facility was a genuine traditional Japanese building that could hardly be seen in Hokkaido. The interior decorations were the mixture of the oriental and the occidental and the furnishing with beautiful decorations was so luxurious that the inside of the facility could be seen by only limited persons such as the board members of the company and the politicians. It had been known as the facility of illusion and so many people recognized the importance of its cultural value that it opened again in 1994 as the memorial building of the coalmine industry. Now the former guest house is used as the auberge named YUZANSO, Please check out the refurbished guest house at http://www.vubari-rokumeikan.com/
