Chicken dishes in Bibai City

"Chicken rice of Nakamura" in Bibai City has been savored whenever the festivity of the community has been held since its pioneering phase of Hokkaido. It is a simple and homely dish of boiled and steamed rice with chicken that is flavored with soy sauce, sugar, and Japanese sake but as it also contains the skin and intestine of chicken, the broth of chicken infiltrates into the rice and makes it so tasty.

Nakamura area of Bibai City started to be developed in 1895. What saved the farmers who had struggled with raising rice crop in this cold climate, fighting against the frequent flood of Ishikari River, was the chickens lent to them from the government.

The citizens shared the delight and shown their hospitality by serving the precious rice and chicken when they received guests from distanced province or the festivities were held. The recipe and the taste of the chicken rice have been handed down through the generations for years and is done even now.
